ABOUT ME

My name is Stanisław, and I am a freshman at Łódź University of Technology. I have a strong passion for learning new things and exploring different technologies. I am eager to broaden my horizons and gain practical knowledge in various areas. I thoroughly enjoy working in groups and possess strong critical thinking skills. Every day, I engage in coding experiments to create new and innovative solutions. I am highly motivated and ready to work hard to develop my technical skills.

EXPERIENCE

I have been math tutor for five years now. Currently, I am seeking for a job related to web development. I believe I have what it takes to become a entry level web developer. Most of my projects are done using React and Next.js with its SSR. However, I am now considering switching to Vite because of its fast development experience. Currently, I am making my projects increasingly complex, so I am learning TypeScript and Docker.

SKILLS

- React
- Chakra UI
- TypeScript
- Tailwind
- Node Js
- C++
- Supabase
- Git
- Next Js
- Linux

ŁÓDŹ UNIVERSITY OF TECHNOLOGY

Infomration Technology 2022 – now

PROJECTS

• SWIFTBOARD

<https://swiftboard.netlify.app/>

A system was developed, leveraging ChatGPT's capabilities, to enhance the onboarding procedure. This initiative was created specifically for the Hack NA ZDROWIE 2 hackathon and secured **first position**, winning the competition. It involved a collaborative effort, and my task was to develop an administrative dashboard. Throughout the project, I gained valuable experience working under time pressure and as a team member.

Key techs: Vite, Supabase, PostgreSQL, Chakra UI, TypeScript, Docker

• TIC TAC TOE ONLINE

<https://tictactoe-sm.netlify.app/>

I developed an application that enables two players on different devices to play a game in real-time and communicate through chat. The game also includes a login and registration page, utilizing cookies for user authentication. This project taught me valuable skills in securing sensitive data.

Key techs: React, Tailwind, Getstream.io, Axios, Express, Universal Cookies

• WEATHER APP

<https://weather-forecast-app-sm.netlify.app/>

I developed an extensive weather application that provides daily weather data such as wind speed and humidity, as well as hourly and daily forecasts for a searched city or the user's current location. Through this project, I gained valuable experience in creating visually appealing websites that are useful for everyday purposes.

Key techs: React, Tailwind, OpenWeather API
